## FROM THE STRUCTURE OUT, WE'VE GOT IT COVERED

BLUECHIP specialises in the manufacture and supply of prefinished architectural cladding and decking systems from the structure out. Our product range includes; all types of cladding and decking materials, engineered fixing systems and insulation products. Based in Perth, BLUECHIP has supplied more than 2,000,000m2 of facade cladding to Australian projects since 2007.

Eovations Technology Decking

Description

TRAXION eovations decking is a giant leap forward in wood-alternative decking. Made in USA, it has the industry’s best strength-to-weight ratio, is incredibly stable and doesn’t absorb moisture. The durable polymer cap stock won’t stain or fade and it provides the highest level slip resistance when tested to Australian standards. The patented eovations technology creates a fiber-like structure inside the material, similar to wood, giving it unmatched strength and the lightweight boards are easy-to-handle on the job site. Quite simply, TRAXION is the best decking material on the market today.

Product Benefits

**EXCELLENT SLIP RESISTANCE**  
TRAXION eovations decking achieves the highest possible slip rating of P5 when tested to the latest Australian standard AS 4586 meaning it is compliant for use in all applications.

**HIGH STRENGTH TO WEIGHT RATIO**  
Kilo-for-kilo, TRAXION eovations decking delivers unprecedented strength and much less dense compared to virtually all other composite construction materials

**MAINTENANCE FREE**  
TRAXION eovations decking contains no cellulose, has no open porosity structure, and is not degraded by common mould enzymes so simply wipe clean at your leisure.

**LOW THERMAL EXPANSION**  
TRAXION eovations decking has a far lower rate of thermal expansion than other composites. This dimensional stability is a huge advantage in maintaining performance and appearance.

**INDUSTRY LEADING WARRANTY**  
TRAXION eovations decking comes with the industry’s leading warranty offering a 25-year Structural and a 25-year Stain & Fade guarantee backed up by the manufacturer in USA.

**NO MOISTURE ABSORPTION**  
Unlike many other composites, TRAXION eovations decking absorbs virtually no moisture; immersion testing shows maximum moisture absorption values of less than 0.2%.

**EXTREME STRENGTH**  
TRAXION eovations decking has exceptional strength due to its oriented internal fibre structure that is a remarkable replication of wood’s internal structure.

**RESISTANCE TO EVERYTHING**  
TRAXION eovations decking is resistant to almost everything including UV, chalking, rot, leaching, cracking, denting, scratching, splintering and insects.

## Through-colour Composite Decking

### Description

Made in USA, RITEDECK timber composite decking by Rightwood (Formerly Durodeck) has most of the attributes of timber with added advantages such as no maintenance, high durability and strength which provide a long-term aesthetically pleasing and cost effective outcome. Contributing to RITEDECK timber composite decking's outstanding physical properties, is the use of patented Strandex technology which offers superior thermal stability and increased UV resistance. This technology is the secret behind the success of this product in the most extreme Australian conditions.

### Product Benefits

**THROUGH-COLOUR MATERIAL**  
RITEDECK timber composite decking is a homogeneous board with the colour of the material going right through. Any scratches are hard to see and can easily be fixed using a wire brush.

**DIMENSIONAL STABILITY**  
Using patented Strandex technology, every strand of wood fibre in RITEDECK decking boards is encased in high-density polyethylene, for minimal movement and superior protection against UV and moisture.

**MAINTENANCE FREE**  
RITEDECK timber composite decking does not require any surface finish at the time of installation and further to this it never requires any oiling, painting or coating over the life of the product.

**ROT & PEST RESISTANT**  
RITEDECK timber composite decking is guaranteed not to rot, split, warp or check. It is highly resistant to damage caused by termites and fungal decay and ideal for use in termite prone areas.

**SECRET FIXING**  
RITEDECK timber composite decking's preloaded secret fix system STOWAWAY hidden fasteners can be installed in 4 quick and easy steps to achieve a clean finish with no pre-drilling and no visible screws.

**WATER RESISTANT**  
Wood fibres used in the RITEDECK boards are encapsulated in virgin polymers during the manufacturing process using the patented strandex technology, allowing no opportunity for moisture ingress.

**COOL UNDERFOOT**  
RITEDECK timber composite decking stays much cooler underfoot than other decking products including natural hardwood. This makes it much safer for children in barefeet, ideal for around pools and wet areas.

**25 YEAR WARRANTY**  
Backed by the manufacturer in USA, the RITEDECK timber composite decking comes with a 25 year limited warranty which guarantees quality and peace of mind for the life or re-sale of your investment.

## Heavy Duty Composite Decking

### Description

RITEBOARD by Rightwood (Formerly Marine Board) is a stunning wood composite decking with superior water and UV resistance that makes it the perfect product for use in building boardwalks, marinas, boat docks, jetties and other waterfront structures. Produced in USA using patented extrusion technology, RITEBOARD will look great and perform well years after real wood has needed replacing many times over. These benefits along with low maintenance and spanning capabilities of up to 600mm between joists make it the ideal product for heavy duty high traffic areas.

### Product Benefits

**THROUGH COLOURED**  
RITEBOARD heavy duty composite decking is an integral board with the colour of the material going right through. Any scratches are very hard to see and can easily be fixed using a wire brush.

**ROT & PEST RESISTANT**  
RITEBOARD heavy duty composite decking is guaranteed not to rot, split, warp or check. It is highly resistant to damage caused by termites and fungal decay and ideal for use in termite prone areas.

**MAINTENANCE FREE**  
RITEBOARD heavy duty composite decking does not require any surface finish at the time of installation and further to this it never requires any oiling, painting or coating over the life of the product.

**WATER RESISTANT**  
All RITEBOARD heavy duty composite decking fibres are encapsulated in virgin polymers during the manufacturing process using the patented strandex technology, allowing no opportunity for moisture ingress.

**HIGH SLIP RESISTANCE**  
RITEBOARD heavy duty composite decking has excellent grip in both wet and dry conditions. Tested to: AS 4586 it achieves Appendix A. Result: Class W (R11) making it ideal for pools and wet areas.

**25 YEAR WARRANTY**  
Made in USA, RITEBOARD heavy duty composite decking comes with a 25 year limited warranty which guarantees quality and peace of mind for the life or re-sale of your investment.

**HIGH DIMENSIONAL STABILITY**  
Using patented Strandex extrusion technology, every strand of wood fibre in RITEBOARD is encased in high-density polyethylene, for minimal movement and superior protection against UV and moisture.

**ENVIRONMENTALLY FRIENDLY**  
RITEBOARD heavy duty composite decking is formulated with a mixture of virgin and recycled high-density polyethylene and wood dust, which promotes product longevity and environmental friendliness.

## Deck Framing System

### Description

RITEFRAME deck framing (Formerly Deckframe) is a heavy duty steel deck sub-framing system which can be easily used in most decking applications and offers fast, cost-effective installation and excellent long-term durability. RITEFRAME deck framing is made entirely from steel which means it is termite proof and is the ideal solution for any termite and insect prone areas where timber is a concern. Furthermore RITEFRAME deck framing is non-combustible with 0 indices for flame-spread, flammability, ignitability and smoke development so is suitable for all areas up to BAL 40.

### Product Benefits

**AUSTRALIAN MADE**  
RITEFRAME deck framing system is manufactured in Australia from high quality galvanised or zincalume steel to ensure ongoing structural performance, durability and longevity in most environments.

**NON-COMBUSTIBLE**  
RITEFRAME deck framing is highly recommended in all bushfire areas including BAL40 as it is made from 100% non-combustible steel components and will not burn.

**VERSATILE SYSTEM**  
The RITEFRAME deck framing system is an adaptive, durable and versatile system that can be easily used to create your decking or boardwalk area sub-construction.

**EXCELLENT DURABILITY**  
RITEFRAME deck framing is far more durable than timber and it is guaranteed not to split, crack, cup, bow, warp, rot or burn even in the harshest locations.

**USER FRIENDLY**  
The RITEFRAME deck framing system is highly flexible and can be used with many types of decking materials such as timber, Rightwood and composite decking.

**FAST INSTALLATION**  
Supplied in all 6.0m long lengths RITEFRAME deck framing is fast to install using standard metal working tools and Tek screws and is guaranteed not to give you splinters

**TERMITE PROOF**  
RITEFRAME deck framing is ideal for use in areas where termites are prevalent because steel is 100% termite proof and not prone to attack like treated timber.

**MINIMAL COMPONENTS**  
RITEFRAME deck framing has only 6 components and along with standard metal working tools, cement and Tek screws that is all you need to build decks up to 2m high.
